

## ISMS/SMS Policy

### NIPA Technology Company Limited

The ISMS/SMS Policy of NIPA Technology Company Limited has been established and authorized by the Chief Executive Officer, who has acknowledged the significance of information technology security, including protecting the confidentiality, integrity, and availability of essential data. The objectives of the policy are to protect information assets from external and internal threats, intentionally or unintentionally, for the purpose of strengthening the trust of users and stakeholders. The company intends for its operations to fulfill global management system standards and adhere to regulations, laws, rules, and principles. To ensure the consistent development of the cloud services and internet data center (IDC) under the nipa.cloud brand and to demonstrate the company's dedication to service quality and information security management system, the company has announced the management system policy to meet global standards as follows:

“The organization will effectively deliver the information technology services, maintain data security, and continuously improve the operations, in order conform to the global-standard management systems that have been implemented.”
